SUPINE TO PRONE

MPS Models

Supine Lying - Flat-to-Load

Supine

Vertical

Prone

True Multi-Position Stander

- The MPS and MPS TT allow supine, vertical and prone positioning without flipping foot plates or pads, moving the tray or transferring out and back in the stander
- Smooth transition from a flat-to-load transfer position, supine, vertical and 20 degrees prone - all in one motion, thanks to the unique pivoting action of the Zing MPS and MPS TT
- Provides therapeutic opportunities not possible with other multi-position standers - use prone for head control and when fatigue sets in, simply move to a slight supine position to rest but remain in the standing position
- Frame will only go supine and upright with Prone Position Lockout engaged

True Hip Pivot Leg Abduction

- Pivot points are in line with the hips, promoting proper alignment in the hips, knees and feet
- Feet maintain the angle with the rest of the legs - no wedges needed and no additional adjustment to the knees or foot plates
- Up to 30 degrees of abduction per leg - accomplished through a single knob
- Promotes musculoskeletal development for children during critical growth years
- Abduction can be adjusted and used throughout the entire positioning range

Plenty of Growth

- **Size 1:** Fits children from infancy to 44", and up to 70lbs
- **Size 2:** Fits children from 40"-60", and up to 154lbs
- Can easily grow with the child and adapt to their changing needs
- Many supports, pads and straps are available in multiple sizes
- Comfortable transfer height of 32" makes transfers more manageable as children grow

Remarkably Modular

- Can be configured as a simple stander or fit a child with the most complex needs
- Designed to grow with the child - options can be added as needed
- Great for a multi-user facility or school

Multi-Use Tray

- The MPS, Supine, MPS TT and Supine TT feature a multi-use tray that is angle adjustable and swings away either direction
- Tray can remain attached during transfers
- More activities are possible by swinging tray away during standing therapy

Unique Lift Mechanisms

- Dual controls are available allowing angle adjustment by foot pedal or hand control
- Gas Spring Lockout prevents an inadvertent change of position, especially important when around other children
- The Pow'r Up Lift option on Size 2 brings the user to the standing position with the touch of a button

Accommodating Contractures

- No special modifications are needed to accommodate children with contractures
- Using the multi-adjustable foot plates, multi-adjustable knee pads and the independent calf pads, it is possible to adjust for contractures in one or both sides

Easy Adjustment

- Tool-free adjustment of all components
- Every adjustment can be made with a simple turn of a knob or ratchet handle
