## ADA GUIDELINES FOR POOL LIFT PLACEMENT

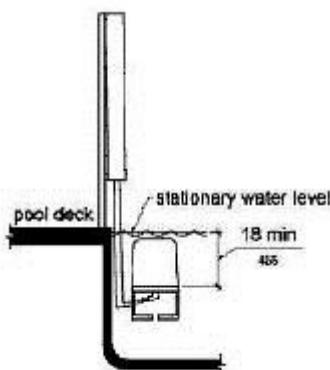

1. Pool Lift Location. Pool lifts shall be located where the water level does not exceed 48 inches (1220 mm).
2. Seat Location. In the raised position, the centerline of the seat shall be located over the deck and 16 inches (405 mm) minimum from the edge of the pool. The deck surface between the centerline of the seat and the pool edge shall have a slope not steeper than 1:48.

3. Clear Deck Space. On the side of the seat opposite the water, a clear deck space shall be provided parallel with the seat. The space shall be 36 inches (915 mm) wide minimum and shall extend forward 48 inches (1220 mm) minimum from a line located 12 inches (305 mm) behind the rear edge of the seat. The clear deck space shall have a slope not steeper than 1:48.

4. Submerged Depth. The lift shall be designed so that the seat will submerge to a water depth of 18 inches (455 mm) minimum below the stationary water level. To make sure the lift has enough clearance the lift should be installed at a location with 48" of Water depth

## **24 VOLT BATTERY SYSTEMS WITH CONTROLS**

All of Global Lift Corp's Commercial Series Lifts are equipped with a sealed 24 volt battery that is rechargeable. Along with a charging unit, hand held controller and control compartment. The 24 volt battery mounts right above the control compartment and the battery simply snaps in. The battery should be charged for 5-8 hours prior to the 1<sup>st</sup> use.

The unit is operated by the 2 button easy to use controls. Staff will use the provided key to unlock the lift. The lock feature is located on the hand controls or front of the control box. Insert the key provided and turn to unlock the unit for use. (Avoid turning the key farther than 45 degrees as it will damage the key) Once unlocked, the arrow pointing down will lower the lift when depressed, the arrow that points up will raise the unit when depressed. If you hear the low battery indicator tone "Do Not Use the Lift" remove the battery from the unit and recharge the battery.

### **RECHARGING THE BATTERY:**

Remove battery from the unit by unclipping from the control compartment. Place the battery in the charging unit. When the battery is charging the light will be illuminated, once fully charged the charge light will go off and then the battery is ready for use in your Commercial series pool lift.

## **COMMERCIAL SERIES POOL LIFT OPERATING INSTRUCTIONS**

Prior to using the Commercial Series Pool Lift perform a test run of the lift empty. Once that is completed and the lift is back to original position, make sure that the arm lifts are in the up position and the seatbelt is unbuckled, once acknowledged you are ready!

Once you are in the seat, buckle the seatbelt (make sure it is snug) and lower the arm rails. Before you attempt to operate the lift, make sure the pathway is clear from any obstacles.

Once you have the 2 button easy controls in your hand, press the arrow that specifies down, keep in mind you don't have to go to the bottom of the cycle, you can stop the lift whenever you deem comfortable to exit the lift. However when exiting the pool while on the lift, you should complete the cycle back to the top to have a completely safe exit from the pool.

Once submerged into the pool, unbuckle the seatbelt and raise the armrest and slide off of the seat. Once you are done with your pool activity, make sure the seat is lowered sufficiently to allow you too easily slide back into the chair. Once you are seated, buckle the seatbelt and make sure that it is snug, lower the armrest.

Next, to raise the lift chair out of the pool, make sure you press the button/arrow that represents up on the control. Apply continuous pressure until the lift comes to a complete stop at the end of the complete up cycle on the deck. You now can unbuckle the seatbelt and raise the arm rest and exit the unit. In the unlikely event that the lift does not return from the water using the hand control, have an attendant press the emergency return button on the front of the control box or on the underside of the control box and the lift will return to pool side.

- (c) If the above does not work then recheck the battery, battery connection or the controls are not connected properly.

## Global Lift Corp Warranty Information

The **Commercial**, **Proformance**, and **Rotational** series lifts have a **Lifetime Limited Warranty** on the metal components of the frame, not including the powder coating process. The **Superior** series lift has a 5 year structural limited warranty. Global Lift Corp warrants to the original retail end user only products manufactured by Global Lift Corp, when properly installed in accordance to the assembly and installation instructions, and when the equipment is properly *used and maintained, be free from material defects and workmanship as stated below:*

- Warranty starts from date of original purchase
- Metal structure (not including powder coat) – Lifetime Limited (**Commercial/Proformance/Rotational Series**)
- Metal structure (not including powder coat) 5 year limited structural warranty (**Superior Series**)
- Actuator and controls – 2 years from date of purchase then 2 years prorated
- Actuator and controls – 3 years 50% coverage (Customer is responsible for 50% of replacement cost)
- Actuator and controls – 4 years 30% coverage (Customer is responsible for 70% of replacement cost)
- Battery – 1 year from date of purchase

*This warranty does not cover damages to ANY of our lifts due to accident, abuse, negligence, misuse, damage by improper use of chemicals, fading, ice damage, fire, rust beyond structural damage( does not cover cosmetic rust), exceeding the weight capacity for model purchased, failure to install or to assemble the product in accordance with the installation and assembly instructions, normal wear and tear from day to day use, not maintained properly, if unit is altered or repaired without written approval of Global Lift Corp – All Warranties are Void.*

## ADA GUIDELINES FOR POOL LIFT PLACEMENT

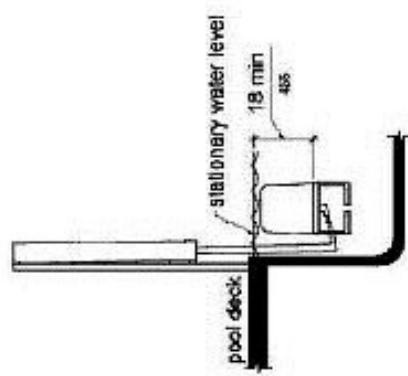

- Pool Lift Location. Pool lifts shall be located where the water level does not exceed 48 inches (1220 mm).  
Seat Location. In the raised position, the centerline of the seat shall be located over the deck and 16 inches (405 mm) minimum from the edge of the pool. The deck surface between the centerline of the seat and the pool edge shall have a slope not steeper than 1:48.

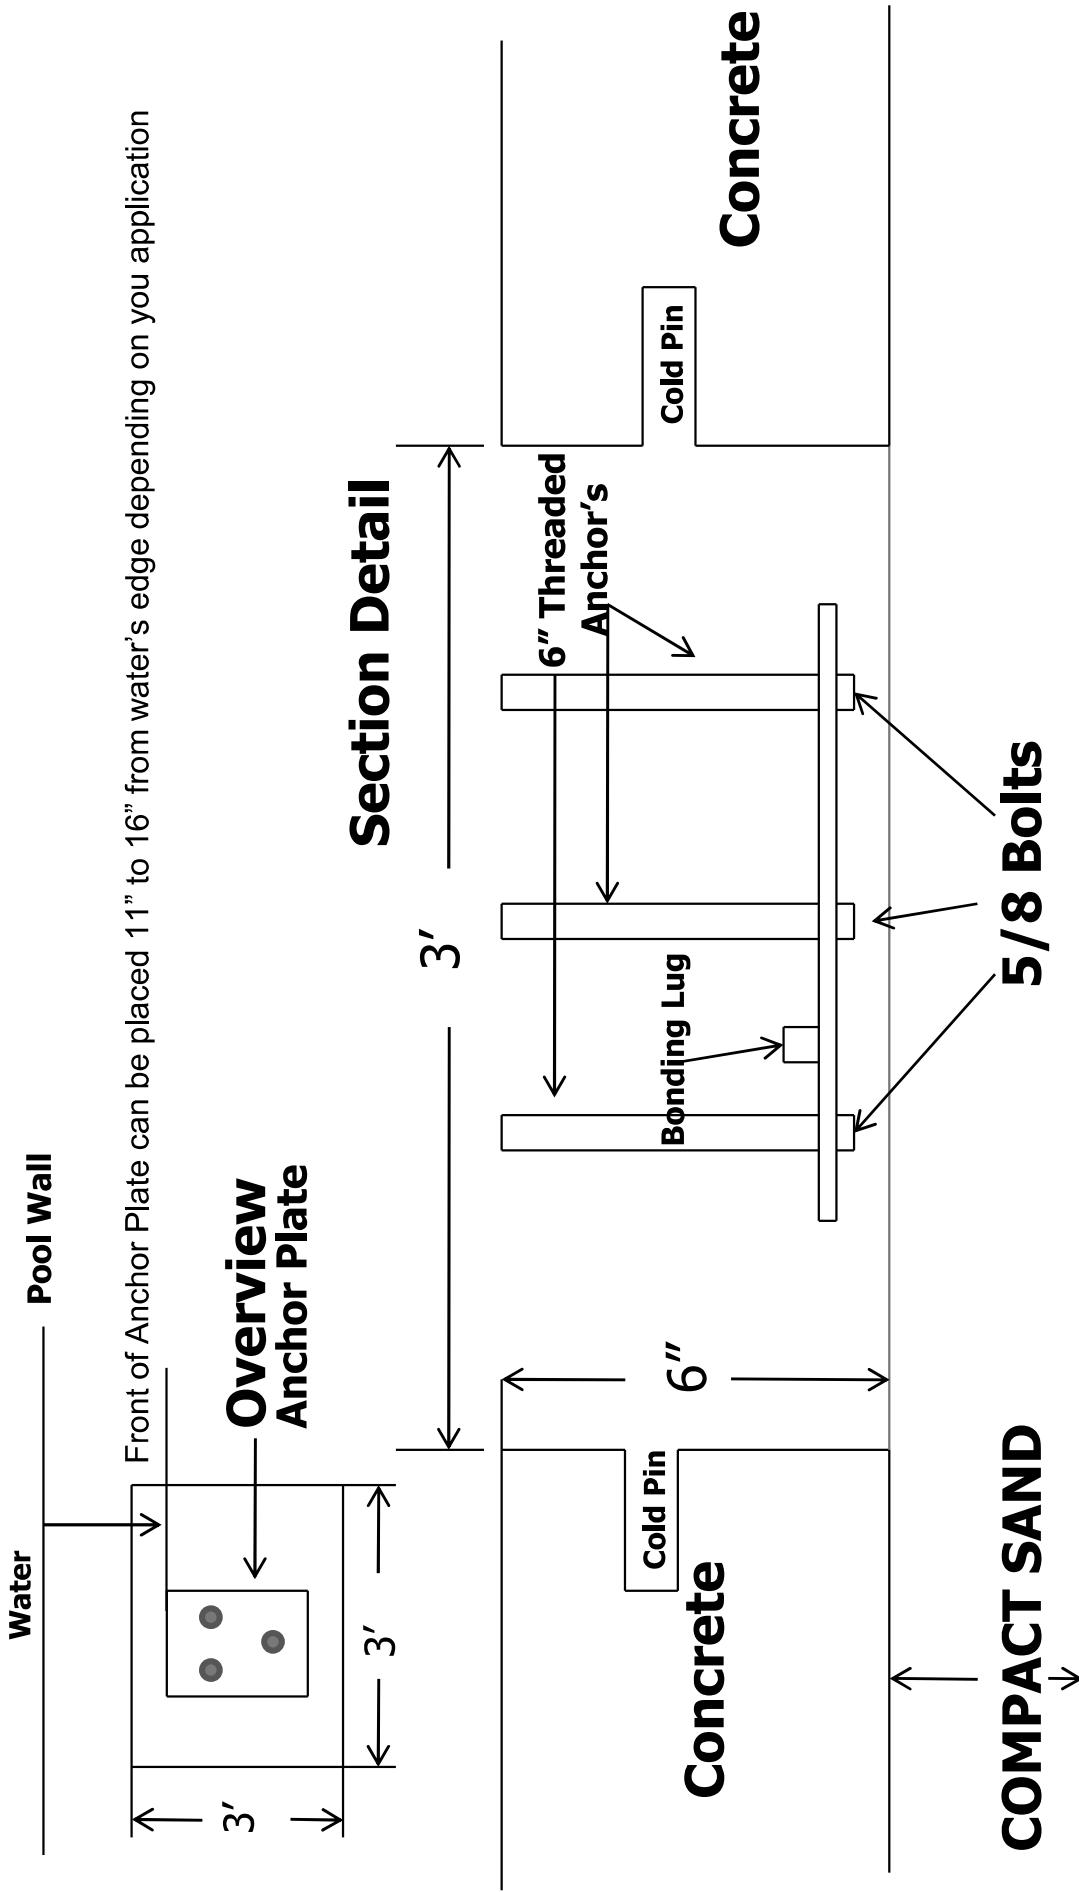

- Clear Deck Space. On the side of the seat opposite the water, a clear deck space shall be provided parallel with the seat. The space shall be 36 inches (915 mm) wide minimum and shall extend forward 48 inches (1220 mm) minimum from a line located 12 inches (305 mm) behind the rear edge of the seat. The clear deck space shall have a slope not steeper than 1:48.

- Submerged Depth. The lift shall be designed so that the seat will submerge to a water depth of 18 inches (455 mm) minimum below the stationary water level.

# COMMERCIAL SERIES C-375/C-450 – TRI POINT ANCHORING SYSTEM

**Optimal placement of the anchor system is 13" from the front of the anchor plate to water's edge.**

**Attach copper wire to the bonding lug and then to your bonding grid**

**Cold Pin's should be 1/2" rebar 6" to 8" long**

**NOTE: Make sure your anchor plate is level and square with your pool's edge.**

**Step 1:** Determine the location for installation (Make sure all ADA requirements are met).

\*\*\*NOTE: The installation of Global Lift Corp's anchor system's are a guideline of minimum requirements. In some states or municipalities they may require additional steps due to their local codes or ordinances.\*\*\*

**Step 2:** Make sure that all the parts are present (Refer to the parts list)

- ✓ 1 - Anchor Plate with Bonding Lug & bolt
- ✓ 3 - 5/8" x 1" Stainless Steel Bolts
- ✓ 3 - 6" Anchors

**Step 3:** At the determined location for installation, chalk out a 3' X 3' area prior to cutting out the concrete. (Refer to overview, the front of the Anchor Plate must be 11" to 16" from the water's edge and 6" deep). New Construction, the concrete must be 6" deep with a 1/2" reinforcing rod, minimum of an 18" grid.

**NOTE: Make sure all local codes and ordinances are met.**

**Step 4:** Once the 3' X 3' area is cut out, make sure you drill in the inner wall of all 4 sides of the area (refer to the section detail) for the purpose of cold pinning the new concrete to the old concrete. Use 1/2" rebar, 6" to 8" in length.

**Step 5:** Attach the 3 – 6" threaded anchor's with the 5/8" x 1" bolts (included) to the Anchor Plate and tighten down.

**Step 6:** Place the Anchor Plate in the area, make sure that the front of the Anchor Plate is 11" to 16" from the water's edge and that the decal's arrow on the anchor plate is pointing to the water's edge (refer to overview). A key element is to make sure that the Anchor Plate is level and square with the pool so that your Commercial Series Lift sits properly on the deck.

**Step 7:** Bonding the unit – The bonding lug is included with the Anchor plate (furthest point from the pool wall on the Anchor Plate) locate the bonding lug, connect the bonding lug to the bonding grid.

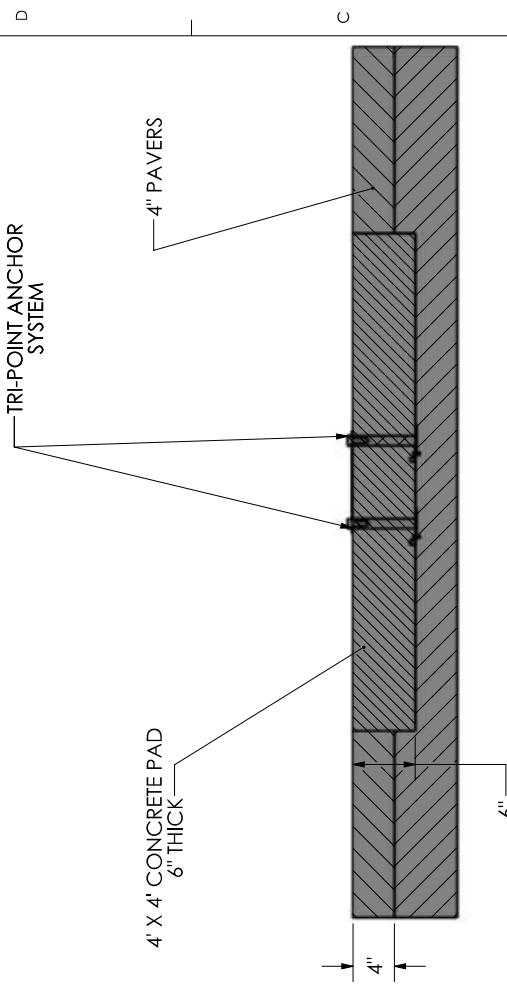

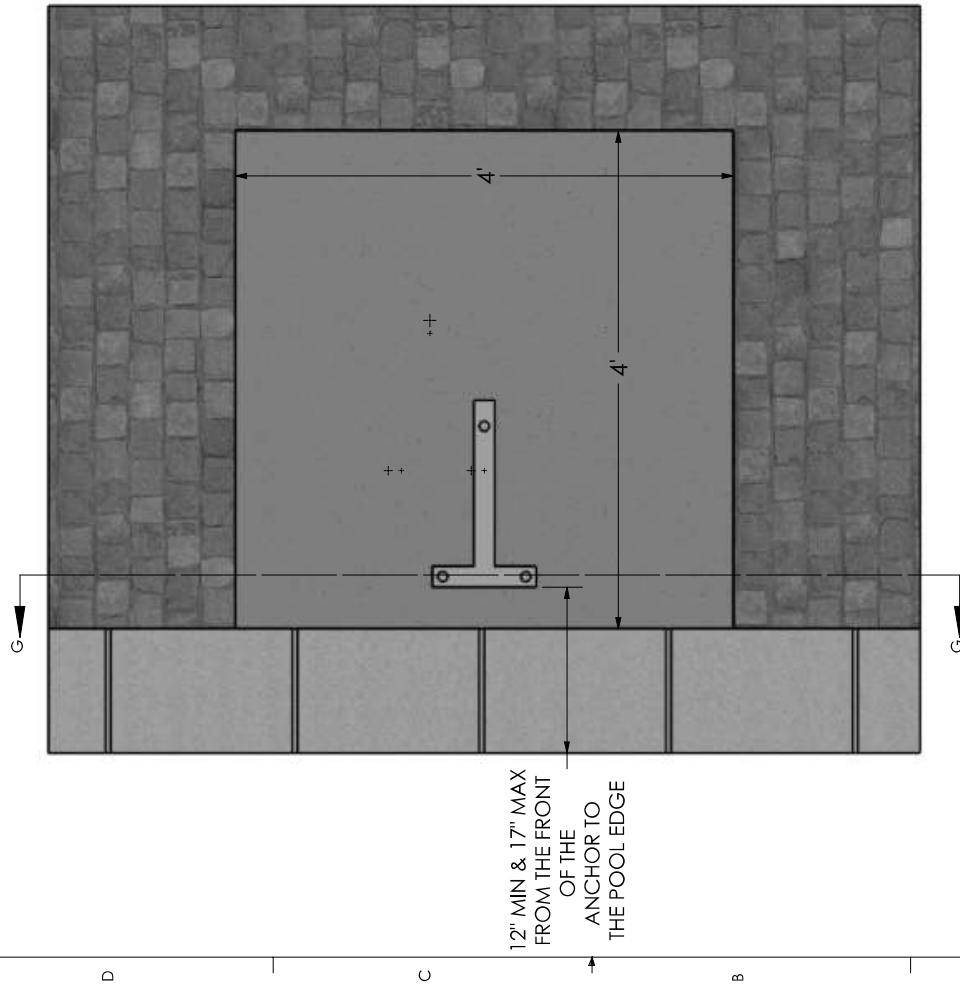

**NOTE: Make sure all local codes and ordinances are met.**

**Step 8:** Pour in your concrete, (make sure you cover the holes in the 3 threaded anchor's so you don't get concrete in the threads) minimum of 4,000 psi with reinforcing rod. Also make sure that the tops of the threaded anchors are flush with the deck. Before you install your lift make sure you let the concrete set up for 48 hours.

**Step 9:** After the concrete has set for 48 hours, now it's time to install your lift. Place your Commercial Series Lift over the anchor holes, screw in the Anchor bolts that are included and tighten down securely. Once you have completed the installation, please refer to User's Manual for a safe operation.

# RETRO-FIT ANCHORING METHOD

C-375/C-450

## COMMERCIAL SERIES LIFTS

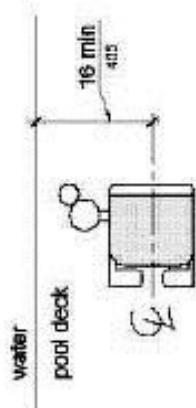

### PACKING LIST

- 3 – Threaded Anchor's with base
- 3 – 5/8" Nuts
- 3 – 5/8"x 1" Bolts
- 3 – Bonding lugs w/nut & bolts
- 3 – Plastic Caps
- 1 – T – Shaped Template

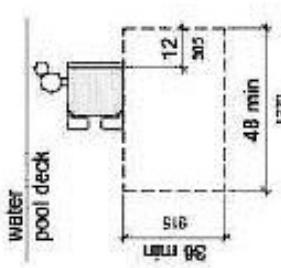

## ADA GUIDELINES FOR POOL LIFT PLACEMENT

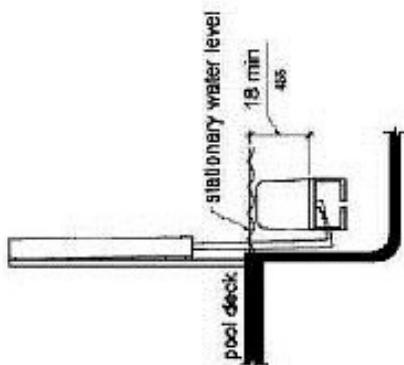

- Pool Lift Location. Pool lifts shall be located where the water level does not exceed 48 inches (1220 mm).  
Seat Location. In the raised position, the centerline of the seat shall be located over the deck and 16 inches (405 mm) minimum from the edge of the pool. The deck surface between the centerline of the seat and the pool edge shall have a slope not steeper than 1:48.

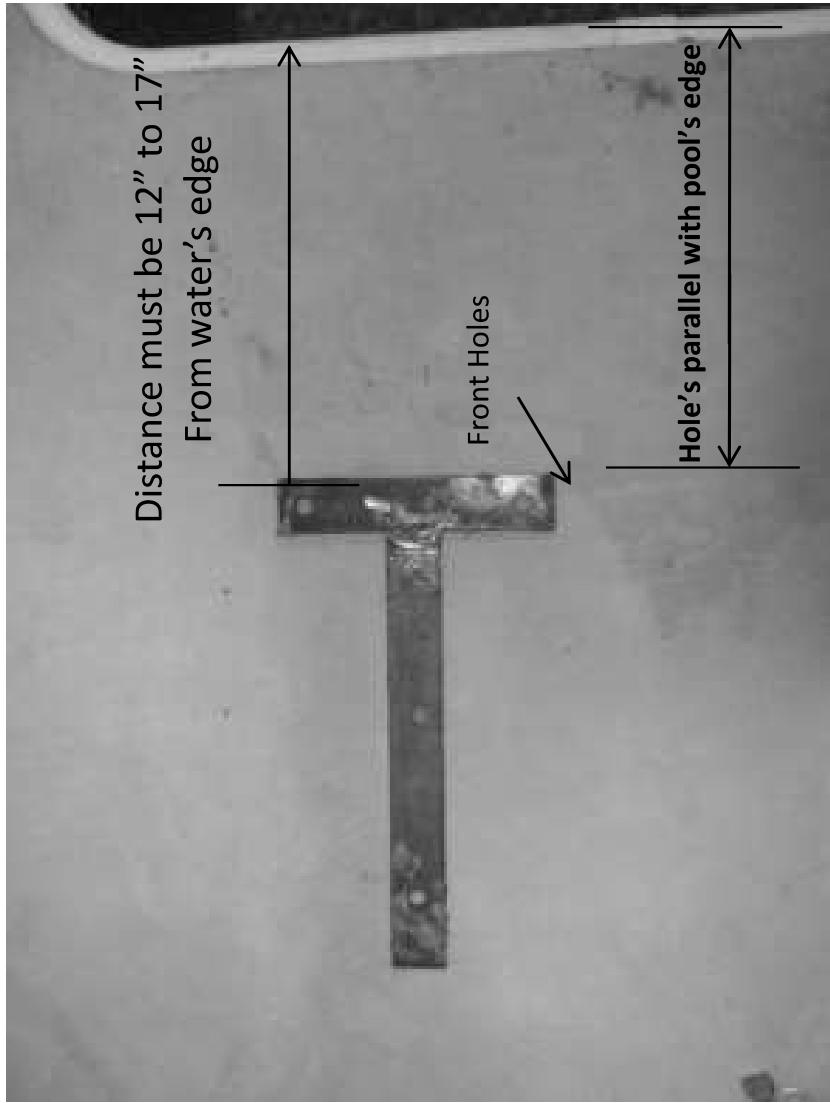

- Clear Deck Space. On the side of the seat opposite the water, a clear deck space shall be provided parallel with the seat. The space shall be 36 inches (915 mm) wide minimum and shall extend forward 48 inches (1220 mm) minimum from a line located 12 inches (305 mm) behind the rear edge of the seat. The clear deck space shall have a slope not steeper than 1:48.

- Submerged Depth. The lift shall be designed so that the seat will submerge to a water depth of 18 inches (455 mm) minimum below the stationary water level.

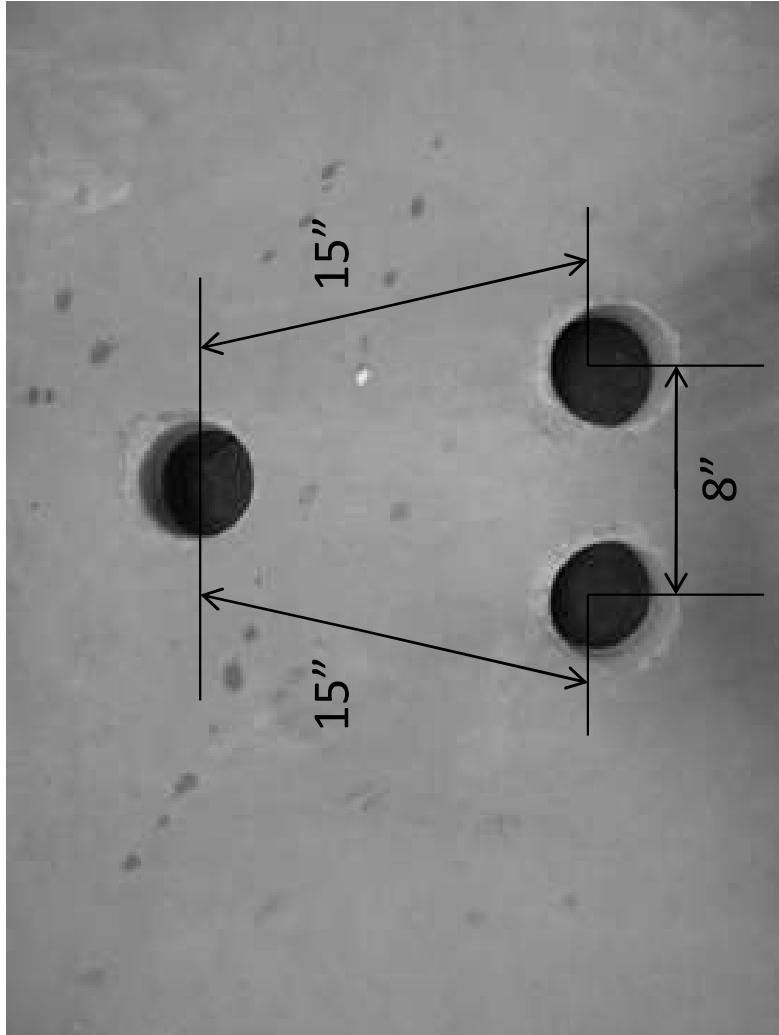

**STEP 1: Locate the retro-fit anchoring system template (included and shown above)**

- Once you determine where your lift is going to be located place the template down so you can mark on the concrete where you will need to drill the holes.
- The dimensions are as follows: Front of the Template must be 12" to 17" from the water's edge, also make sure that the front holes are parallel to the pools edge.

\*\*\*NOTE: The installation of Global Lift Corp's anchor system's are a guideline of minimum requirements. In some states or municipalities they may require additional steps due to their local codes or ordinances. \*\*\*

**Step 2:** You will need a 4" diameter core drilling bit.

- Make sure you have accurately marked your hole location to be drilled. After drilling Your holes they must be 6" deep and flat on the bottom of the hole (shown above). Clean Out the debris and make the holes are free from concrete. Double check your measurements they should be: Front holes 8" from centerline from hole to hole (see above). The measurement from front to back should be 15" from Centerline of each hole (see above)

Note: Anchor must be  
Electrically bonded. Please  
See the NEC requirements.

Picture B

Picture A

**STEP 3:** Assemble the template with the 3 threaded anchor rods.

- Place a 5/8" nut on top of each threaded rod, then place the template on top and bolt Down with the 5/8" bolts provided (refer to picture A).
- Place the assembly in your drilled holes as shown in picture B. make sure that the top Of the anchor rods are flush and level with the existing concrete, also with connecting the Bonding lugs to the bonding grid according to the local codes and ordinances

Picture A

Picture B

**STEP 4: Cementing the anchor in the concrete.**

- You will need 20lbs of Quick dry Anchoring Cement (Commercial Grade Quikrete Exterior Use Anchoring Cement) to complete the installation. You can purchase at any hardware store in your area. Read the label and follow manufacturer's instructions.
- Start pouring into the 3 holes evenly until you fill them up, make sure not to overfill the Holes so that it does not create more work to scrap excess concrete off.
- Let the concrete set for 24hrs, Remove the template then sand the area with a sand stone to smooth the finish. Make sure the anchor's are flush with the concrete (picture B)
- You are now ready to install your Commercial Series lift.

# **DROP IN ANCHOR METHOD**

**C-375/C-450**

## **COMMERCIAL SERIES LIFTS INSTALLATION MANUAL**

The Drop In Anchor System does not allow for a bond. You can Bond directly to the lift with the bonding lug provided or some alternate means. Please contact your local electrical inspector Before installing any anchoring systems

# **DROP IN ANCHORING METHOD**

**C-375/C-450**

## **COMMERCIAL SERIES LIFTS**

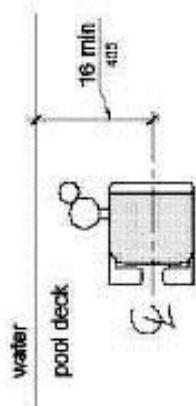

### **PACKING LIST**

- 3 – Drop In Anchor's
- 3 – 5/8" x 1" Bolts
- 1 – T – Shaped Template
- 3 – Black Caps
- 1 – Bonding Lug w/ nut & bolt

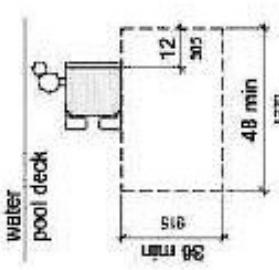

## ADA GUIDELINES FOR POOL LIFT PLACEMENT

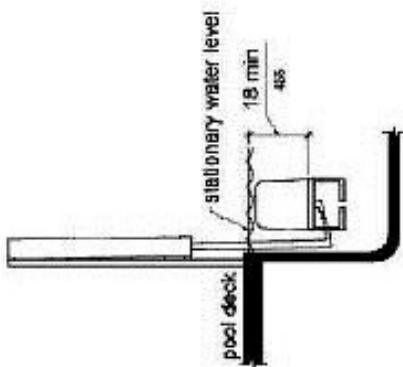

- Pool Lift Location. Pool lifts shall be located where the water level does not exceed 48 inches (1220 mm).  
Seat Location. In the raised position, the centerline of the seat shall be located over the deck and 16 inches (405 mm) minimum from the edge of the pool. The deck surface between the centerline of the seat and the pool edge shall have a slope not steeper than 1:48.

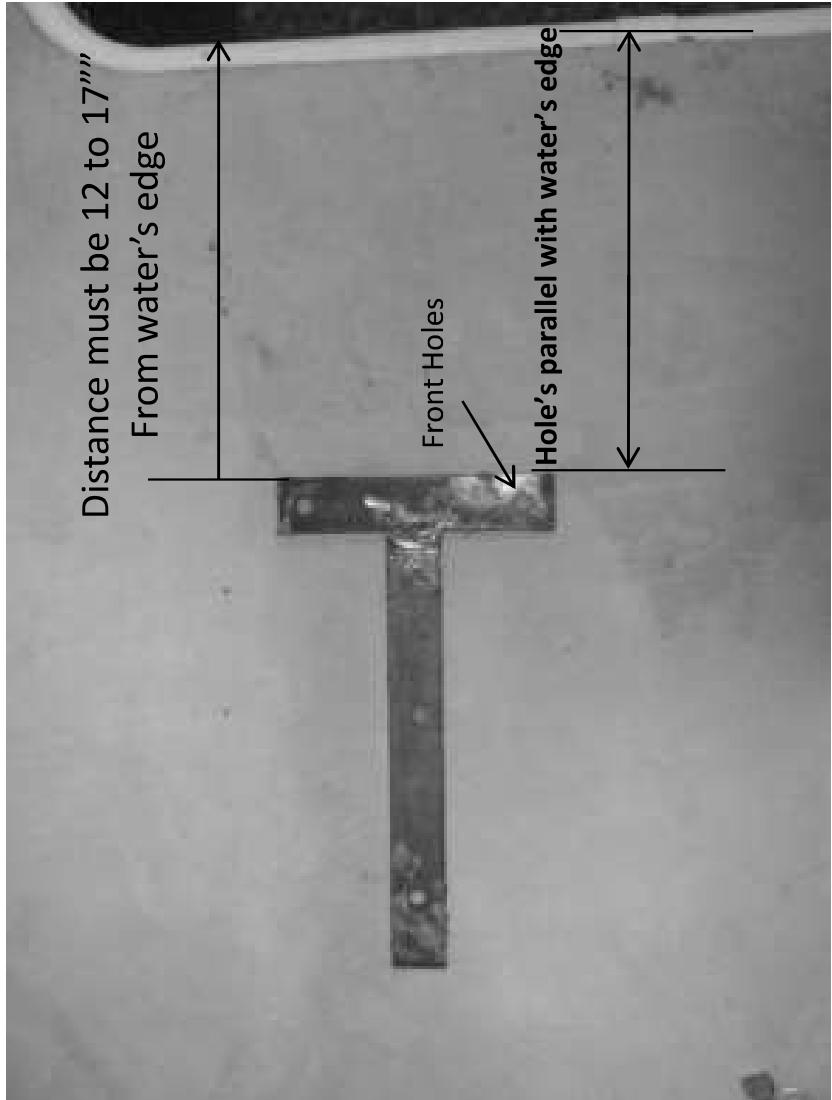

- Clear Deck Space. On the side of the seat opposite the water, a clear deck space shall be provided parallel with the seat. The space shall be 36 inches (915 mm) wide minimum and shall extend forward 48 inches (1220 mm) minimum from a line located 12 inches (305 mm) behind the rear edge of the seat. The clear deck space shall have a slope not steeper than 1:48.

- Submerged Depth. The lift shall be designed so that the seat will submerge to a water depth of 18 inches (455 mm) minimum below the stationary water level.

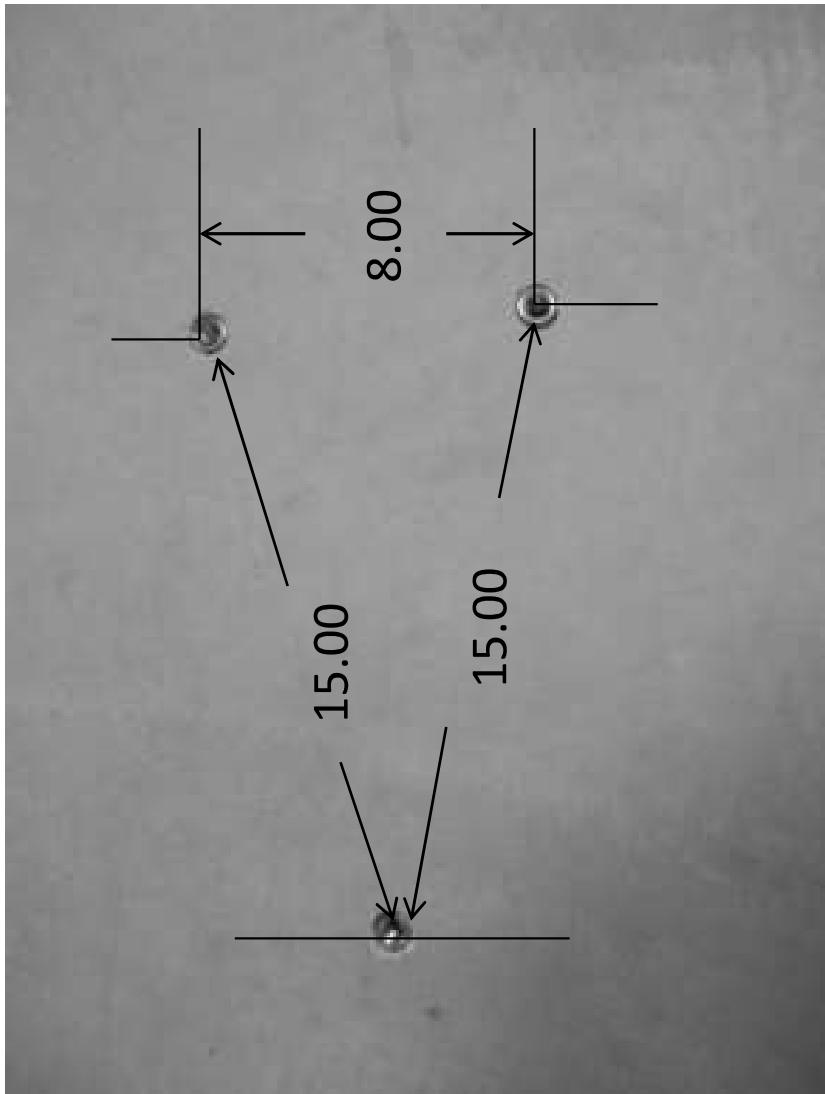

**STEP 1: Locate the Drop In anchoring system template (included and shown above)**

- Once you determine where your lift is going to be located place the template down so you can mark on the concrete where you will need to drill the holes.
- The dimensions are as follows: Front of Template must be 12" to 17" From the water's edge. Also make sure that the front holes are parallel to the pools edge.

**\*\*\*NOTE: The installation of Global Lift Corp's anchor system's are a guideline of minimum requirements. In some states or municipalities they may require additional steps due to their local codes or ordinances. \*\*\***

**Step 2:** You will need a 7/8" rock carbide drilling bit.

- Make sure you have accurately marked your hole location to be drilled. After drilling Your holes they must be 2 1/2" deep. Double check your measurements they should be: Front holes 8" from centerline from hole to hole (see above). The measurement from front to back should be 15" from Centerline of each hole (see above). Clean hole with pressurized Air or a vacuum.

Picture A

Picture B

### STEP 3:

- Administer Epoxy into the hole prior to inserting the drop in anchor.
- Drive the anchor flush with the surface of concrete (shown in picture A)
- Expand the anchor with the setting tool (provided). Anchor is properly expanded when shoulder of the setting tool is flush with the top of the anchor (shown in picture B).
- Global Lift has provided a bonding lug that you will need to drill & attach to the lift, due to there is no means to bond to the drop in anchor's. Please check local & state codes.
- Now you are ready to install your Commercial Series Lift.

**GLOBAL LIFT CORP**

**C-375/C-450**

**COMMERCIAL SERIES PORTABLE KIT**

Portable Kit - [www.globalliftcorp.com](http://www.globalliftcorp.com)

Feb 2012

**COMMERCIAL SERIES**  
**C-375/C-450**  
**PORTABLE KIT PARTS LIST**

- 4 - 1/4 x 3/4" Carriage Bolts w/ lock nuts
- 2 - 5/16 x 3/4" Bolts w/ lock nuts
- 6 - Lock Nuts
- 2 - Stabilizer Bars
- 1 - Lifting Unit
- 1 - Screw w/ washer
- 4 - 1" round caps
- 2 - 2" x 3" caps
- 2 - 1" x 1" square caps

# COMMERCIAL SERIES – C375/C-450 PORTABLE KIT EASY INSTALLATION

## • INSTALLING THE STABILIZER BARS

1. Insert the four  $1/4 \times 3/4$  carriage bolts (provided) from underneath the lift in the pre-punched square holes on both ends of the lift.
2. Place the two stabilizer bars onto the bolts (as shown in picture B).
3. Place the Lock nuts on and tighten down with a deep well socket.
4. Place the  $2'' \times 3''$  black cap on the backside of the stabilizer bars.
5. Place the 1" round caps in the holes after the nuts are tightened down securely.

Feb 2012

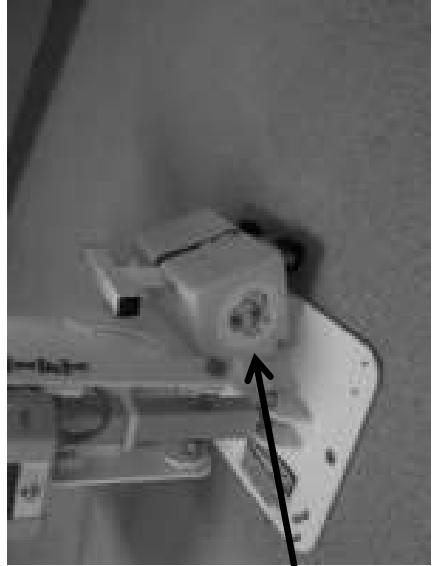

Portable Kit - [www.globalliftcorp.com](http://www.globalliftcorp.com)

# COMMERCIAL SERIES – C375/C450 PORTABLE KIT EASY INSTALLATION

## • INSTALLING THE LIFTING UNIT

1. On the “opposite” side of the stabilizer bars locate the four pre-punched square holes.
2. Place the 2 – 5/16 x 3/4” carriage bolts (provided) in the pre-punched square holes from underneath the lift.
3. Place the lifting unit on the bolts
4. Place the lock nuts on and tighten securely.
5. Place the lifting unit's cover on and secure with screws provided.

Lifting Unit

Feb 2012

Portable Kit - [www.globalliftcorp.com](http://www.globalliftcorp.com)

# COMMERCIAL SERIES – C375/C450 PORTABLE KIT EASY OPERATION

## • OPERATING THE COMMERCIAL SERIES PORTABLE KIT

Once you make sure all the components are securely fastened, Locate the operating handle on The portable kit.

When your lift is in use, the portable kit should be in the up Position and the lift is secured to the deck with the 3 anchor Bolts.

Once you are ready to store your lift, remove the 3 Anchor bolts, push down on the Lifting Unit's handle, the lift will raise and then you are able to roll with ease to your storage location.

**GLOBAL LIFT CORP**  
**CUSTOM SEAT INSTALLATION MANUAL**  
**C, P & S Series Lifts**

**GLOBAL LIFT CORP**  
**CUSTOM SEAT INSTALLATION**  
**MANUAL**

**PARTS LIST**

- 1 - Custom Seat
- 1 - Foot Rest
- 2 - Arm Rests
- 1 - Seat Belt & Buckle
- 1 -  $1\frac{1}{2}'' \times 2\frac{3}{4}''$  Securing Bolt
- 3 -  $5/16 \times 3''$  Attaching Pin with lock nut
- 1 -  $5/16 \times 2''$  Foot Rest attaching bolt w/ nut
- 1 - 2" Round cap
- 1 - 1" Round cap

# INSTALLATION STEPS

Picture A

## Step 1:

Unpack your custom seat (picture A). Loose Items will consist of:

- Foot Rest and Tube
- $\frac{1}{2}'' \times 3''$  Bolt w/ lock nut
- $5/16'' \times 2 \frac{3}{4}''$  Bolt with Lock nut

# INSTALLATION STEPS

Picture A

Step 2:

Align your custom seat (Picture A), slide the lower seat tube into the upper Seat tube.

Picture B

Step 3:

Once you have the seat in place, take your  $\frac{1}{2}'' \times 3''$  bolt and slide it through the pre-drilled Holes (Picture B). Once you have inserted the bolt all the way through, apply the locking nut (supplied) and tighten down.

## INSTALLATION STEPS

### Step 4:

Locate the 5/16 x 3" securing bolt (supplied), insert the bolt through the pre-drilled Seat and tube holes (As shown Above). Once you have the bolt inserted, secure the installation With the lock nut that is provided and tighten down.

# INSTALLATION STEPS

## FOOT REST

Picture A

Picture B

### Step 5:

In picture A, slide the foot tube through the foot rest sleeve and line the hole to the Slot. In picture B, locate the 5/16" x 2" bolt and insert into the pre-drilled holes to secure the foot rest to the lift. Place the lock nut on the bolt and tighten down. Once that is complete, you are ready to enjoy your Global Lift Corp pool lift.
